

Online Learning tips for parents

Being the best you can be - *Optimum esse vos esse*

As our school motto says, we are here to do our best.

Teachers understand that good teaching strategies take time to develop and they don't expect parents to teach in the same way.

The teachers at Bentleigh are here to help you by providing online learning content, support and assistance.

Maintain a daily routine

Following a routine helps students to develop good working habits, to maximise their efficiency and facilitate their learning goals.

For teachers, routines are central to daily classroom life.

At home, establish your child's daily learning routine to make it easier for them to learn and achieve more at home.

Learning should be enjoyable

Show interest in your child's learning as this encourages them to talk about the work they're doing at home and promotes positive interaction. Learning should not be a chore.

Learners build knowledge as they explore and interact with the world around them. They observe, discuss and engage with others and make connections. As a parent you play a crucial role in ensuring this.

Contact teachers

If you have a question, please email your child's teacher or HOYL during the hours of 9:00 am - 3.10pm.

Please be mindful that our teachers are busy with students as well as daily tasks and will respond to you within 24hrs.

Let's keep working constructively together to support our children.
